

NUMECA International (<http://www.numeca.be/en>) offers a stimulating, young and multicultural environment at the heart of Europe and inviting students to its headquarters for an internship in the field of **human-computer interaction**, **graphic design** and **web design**. As a member of the NUMECA team, you will be trained on NUMECA tools and work on improving the GUI design of a software in order to increase the human computer interaction quality and software ergonomics.

We are looking for students that feel comfortable dealing with vector graphics editors such as *Inkscape*. Knowledge of the *QML* language is a plus. The student should also be able to participate in internal meetings by providing a valuable contribution and valuing inputs made by others, in order to reach a common goal. Written/oral communication English is essential. French is a plus.

The duration of the internship would ideally range from 2 to 4 months.
