

# Software Developer – Traineeship

## GEVERS

Our objective is to be the privileged partner for the protection, the management and the exploitation of intellectual property along the full life-cycle of companies assets, totally aligned with their business strategy. Founded in 1898, present in 3 countries with 8 offices in Belgium, France and Switzerland, we are 300 enthusiast people, managing more than 210.000 IP rights, 13.000 managed oppositions, covering more than 180 countries.

The task is challenging, in a highly quality demanding world, but you would work face to face with our entire team supporting you during all steps. Location : headquarters in Diegem.

## Job description

We are looking for a C# developer responsible for building C# applications, including anything from back-end services to their client-end counterparts. Your primary responsibilities will be to design and develop these applications, and to coordinate with the team working on different layers of the infrastructure. Therefore, a commitment to collaborative problem solving, sophisticated design, and quality product is essential.

## Project

Integrate new modules into a Client Portal, that gathers all the relevant information linked to Client Intellectual Property (“IP”) portfolio.

This tools aims at structuring information related to the Client IP portfolio in various dimensions:

- The IP-related information for each product / process
- The information directly related to each patent
- The IP-related information for each activity sector
- The Trademark notices related to possible infringement

Based on a complete and structured information, the portal will provide different main use applications:

- An information tool on the global IP portfolio
- A scoring and valuation tool to compare all the IP assets following different criteria
- A reporting tool towards the organization

- A decision-making tool for IP portfolio and innovation management
- A decision-making tool for IP Trademark opposition matters

## Personal and social skills

- You're able to seek and learn by yourself
- You're a good team player as you'll have to work with other developers/designers and refer to other departments as well.
- You have a strong eye for details just as you're efficient and reliable

## Language skills

- Excellent oral and written English and 2nd EU language (Dutch/French)

## IT skills

- Proficient in C#, with a good knowledge of its ecosystems
- Familiarity with the .NET framework
- Strong understanding of object-oriented programming
- Familiarity with various libraries (Kendo UI, Serenity)
- Familiar with various design and architectural patterns
- Understanding WCF framework for building service-oriented applications
- Familiarity with Microsoft SQL Server
- Understanding 3NF Data Warehouse architecture
- Understanding fundamental design principles behind a scalable application
- Creating database schemas that represent and support business processes
- Implementing testing platforms and unit tests
- Proficient understanding of code versioning tools such as SVN, and TFS
- Familiarity with continuous integration and agile methodology
- Documentation (Requirements gathering, Functional specification, QA test cases, Technical documentation, Development and User Manual)
